DETAILED ACTION

Election/Restrictions

The restriction requirement of 4/9/03 has been deemed improper and has been withdrawn. A Supplemental Amendment has been received which reinstates claims 1-5 and 19-21. Accordingly, claims 1-21 were examined on the merits.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Garofalo (U.S. 5,881,394). Garofalo '394 discloses the invention as claimed. Garofalo teaches a buckle assembly for securing and adjusting a strap comprising a frame 203 having an exterior border and in interior border, the interior border having opposed regions, and a pivotable member 213 pivotable attached to two opposed portions of the interior border, the pivotable member having a longitudinal axis and attached to a strap 3 along the longitudinal axis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3765

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Garofalo '394 in view of Chiang (U.S. 5,734,995). Garofalo discloses the invention substantially as claimed. However, Garofalo does not teach an elastic strap. Chiang '995 teaches goggles with an elastic strap 70. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the assembly of Garofalo with an elastic strap because this allows for the strap to accommodate a variety of head sizes.

Allowable Subject Matter

5. Claims 6-21 are allowable because the prior art does not teach or disclose a goggle assembly comprising goggles with first and second straps, with a buckle assembly attached to the second end of the second strap, the buckle assembly including: a pivotable member pivotably attached to two opposed portions of an interior border of a frame, and the second end of the strap attached to the pivotable member along the longitudinal axis.

6. Claims 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Uke (U.S. 4,112,521), Nishiyama (U.S. 4,564,960), and Yang et al. (U.S. 6,212,740) teach relevant prior art.
